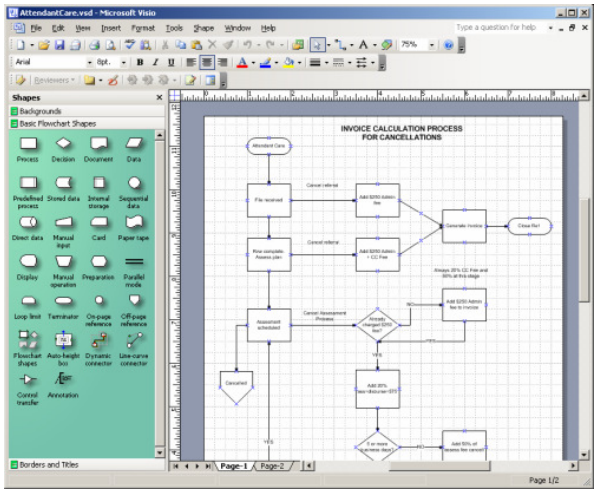
Ultimus Visio Converter

Introduction

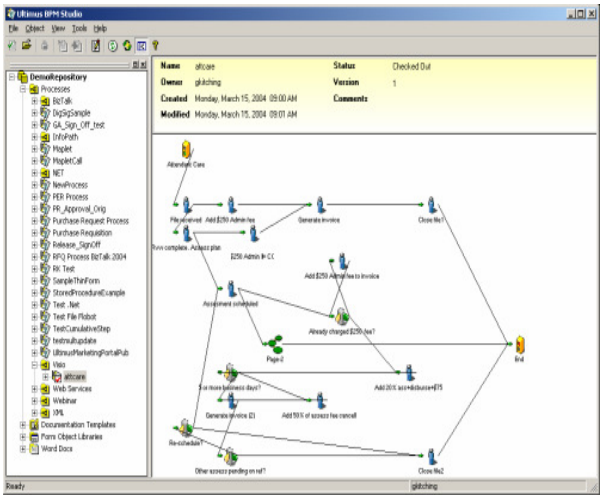
The Ultimus Visio Converter is a powerful utility that supports the rapid generation of Ultimus process maps (.WFL files) directly from Microsoft Office Visio 2003 process diagrams, allowing you to gain a rapid head start in automating your business processes.

Microsoft Office Visio



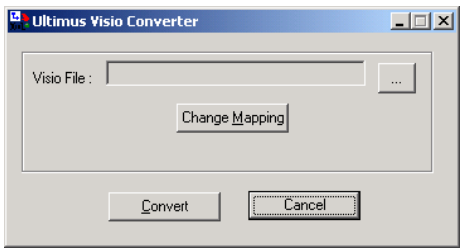
Ultimus Visio Converter

Ultimus BPM Studio



1 Simple Step to Process Automation

Converting Visio process map diagrams to Ultimus process maps (.WFL files) is easy and intuitive. All you need to do is to specify the location of the Visio file, specify the target location of the Ultimus process map file, and hit the Convert button.



Benefits

- Get a head-start in automating business processes by leveraging your existing investments in Microsoft Office Visio
- Simple one-click conversion functionality makes conversion a rapid, simple effort

The Ultimus .WFL file will then be generated, and can be imported into the Ultimus BPM Studio for rapid automation and deployment. For more information on Ultimus' extensive support for other Microsoft technologies, please visit www.ultimus.com for more information.
